How to import bedwars on minecraft education edition

Last modified on Jul 5, 2021 in gametypes By ApexHosting BedwarsCheckoutOverviewVanilla Minecraft is cool and all, but wouldn't it be awesome if we played minigames like the rest of the community? One of the best and most popular choices that I suggest is Bedwars. Bedwars is an awesome PvP gamemode that revolves around multiple teams that each have a bed. When said bed is destroyed, the team will lose the ability to respawn. There are resource generators and shops that can be used to acquire items to make it easier to kill players and destroy their beds. How it WorksBedwars is a very big plugin and contains a lot of features. Three maps are already setup. One that can house four teams with a single player on each team, two with four teams with two players on each team. To get into the game, walk forward and there are signs which can be clicked in order to join the game. You will then be sent to a lobby when you can choose your team etc.Permissions are set up like so:MemberThis is an Unordered List ItemRanks 1-5ModAdminOwner All of the permissions are set up for you, but you will need to adjust them based on the rank names depending on your needs. Everything spawn-related is protected with worldguard, so you do not have to worry about preventing griefing or setting this up yourself.Install through the panelMake sure your server is running Bukkit, Spigot, or Paper. You can check this in the jar dropdown on the game panel dashboard.To the left of the game panel, press the Plugins List tab.Type in "Bedwars" in the name search and scroll until you find it. Then click on it to open the download page.At the bottom of the page, check the version you have selected. It's good to cross-reference this to the official Bukkit or Spigot page.Find the correct version from the version dropdown, select it and press install.Go back to the Game Panel and restart your server. You can check if the plugin was installed successfully by typing "pl" into console.Install through FTPGo to the official Bedwars page and click on the version history tab.Find the update that is compatible with your server version and press the download icon.Head to the Game Panel and click FTP File Access to the left of the panel.Once you login to the FTP File Access you will see a list of your files. Open the plugins folder and click "Upload" to the top left of the page.Drag your plugin over to the right side of the page and wait for it to reach 100%.Go back to the Game Panel and restart your server. The plugin should now be installed. You can check this by typing "pl" into console.ConfigurationsNAMETAGEDIT GROUP NAMES All the groups in NTE are placed behind names (Rank 1, etc) so you will need to update the rank names and then change the permissions for them as well.ESENTIALS CHAT FORMAT Chat format also include placeholder names with Ranks 1-5. You will need to change these AND the name of the PermissionsEX group names to correspond to them for the chat format to work.PermissionsEX I've set up staff groups and 5 donator groups all with the correct permissions. You will need to change the group names to donator roles, or whatever you would like.TITLEMANAGER Feel free to configure anything in titlmanager, which affects the titles on your screen when you join along with the lines in the tab.DELUXETAGS These are setup with default tags consisting of #TAG 1-6. You can change these to anything you wish, give permissions and these will appear after people's names in chat once they select one.Holograms HolographicDisplays allows you to edit holograms. This includes most of the floating text you see like the leaderboards, but you can change them to show whatever you would like.bAnnouncer This will affect the automatic announcements in chat and can be edited to your liking.ConclusionAll in all, Bedwars is a very fun gamemode that you're bound to have lots of fun with. Whether it's rushing an enemy team's bed with complete disregard for your own, or turtling up under concrete defense, there are so many possibilities. If anything, you should brush up on your speedbridging. I hope this guide helped you, and have a great day!ResourcesYou can find the official plugin here.The Wiki page is strongly suggested to check out as it tells you exactly what you need to do to setup a map.Find all necessary commands hereFind NameTagEdit here. Open Minecraft and press the Play button. Navigate to the server tab and select "Lifeboat Network". Loading...2...3...4... Activate your compass! Choose "Game Type Selector". Select "BedWars" from the game type selector menu. If prompted to download a world resource pack, select "Download & Join". Joining a Match To join a match locate the "QUICKPLAY" portal and walk through it. Playing BedWars The goal in BedWars is to destroy the opposing teams' beds while protecting your own. The Bed While your team's bed is in-tact, you'll have unlimited lives. If the bed gets destroyed, you will be on your last life. Protect the Bed Protect your teams bed as if your life depended on it... because it does! Preparing for Battle Before engaging in battle prepare yourself with some gear. Brick Spanner Bricks are the lowest form of currency in bed wars. Locate the brick spanner and start collecting bricks. Iron Spanner Iron spawns iron less often but is worth a lot more. Gold Spanner Gold is the most valuable currency in the game but is the hardest to get to. Gold can be found near the center of the map. Building a bridge is necessary to acquire gold ingots. Download mods for Minecraft version 1.7.10 only! Others will not work!(1.7.10 = Current version of Minecrafterdu) Mods (1) add content, (2) excite students, and (3) add to the variability of creations On the server computer, load files in step 5 On the client (user) computers, load files in step 4 on EACH computer!Close all sessions of MinecrafterduDownload mods (.jar files and/or .zip files) Copy the mods files (you do NOT need to unzip/unpack) Click the Windows Start buttonIn the search box, type in %appdata% (% = Shift+5) then hit "Enter" Client Mods (Mods for the player)Double-click folders in this order:MinecrafterduMinecraftMods1.7.10 (*Tip: Create a shortcut to this folder!)Paste all mods into that folders. Server Mods: Install ONLY on the server computer!Go back to the Minecrafterdu folder(From %appdata%, Roaming)\Minecraft\user\tools\server\mods1.7.10Paste all mods, but leave out display mods like Rei's Minimap, Damage Indicators, and Better HUD6. Start Minecrafterdu and the mods will automatically load7. If the server doesn't start, then one of the mods is crashing it Not all versions of the game feature Skin Packs but you will be able to find them in Windows 10 Edition, Minecraft PE, and the console editions (Nintendo Switch, Xbox One, Wii U, PS). 1.
